

User Flow:

Finding the right product through search.

Step 1:
The user is able to begin their search from the home screen. The user can click the search input.

Step 2:
The user receives a keyboard prompt within a search overlay and is able to enter their search.

Step 2.1:
The user is also able to find the right product if it shows up on the home screen.

Step 3:
As the user types, the product gives the user suggestions of potential searches. The user clicks on the search item that relates most to their intended search.

Step 4:
The user is presented with many search results and now they choose the product that they have been looking for.

Step 5:
The user is now able to review a product that they had searched for and can decide if they want to add the item to their cart.
